

# Ultra W-TT

tilt & turn windows

For a progressive fenestration system of the next generation try Ultra W-TT windows by Ultra Glass. Featuring dual action operation this casement system represents the epitome of modern living. Depending on your preference, it's versatile functionality either swings or tilts to maximize ventilation and protection.

A popular choice among residential and commercial establishments alike, Ultra W-TT windows minimize artificial air consumption. It's ability to do so provides architects and users with a significantly more sustainable approach. We welcome everyone to explore the revolutionary operating system that stands at the forefront of stylish and passive design applications.

*The Ultra W-TT is certified by NFRC 100/200/400/500, ASTM E90, E90, AAMA/WDMA/CSA 101/1.5.2/A440-08 meeting and exceeding industry standards in US and Europe.*
